Andrew Tran

trandrew96@gmail.com
www.trandrew.ca

SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Frontend: React, TailwindCSS, Jinja and Twig Templating Engines
Backend: FastAPI, Node.js, Flask
Tools & Platforms: Git, Firebase, REST APIs

SOFTWARE PROJECTS

Videogame Content App | React, TypeScript, FastAPI, PostgreSQL, Firebase Auth (*crosspoint.trandrew.ca*)

- Engineered full-stack web application for browsing and reviewing large-scale videogame datasets
- Built a REST API using FastAPI with structured data modeling and asynchronous request handling
- Integrated Firebase Authentication for secure user login and protected routes
- Developed reusable React component architecture and responsive UI inspired by modern media tracking platforms
- Deployed frontend and backend separately using Firebase Hosting and Railway

Movie Content App | React, Firebase *(cinetrack.trandrew.ca)*

- Built responsive React application for browsing and organizing movie content
- Implemented Firebase-based authentication and cloud data storage
- Designed interactive UI components for user-created lists and saved content

PROFESSIONAL SOFTWARE EXPERIENCE

Web Developer Consultant **Ingram Pharmacy** **Apr 2024 - Jan 2025**

Shopify Store for family-owned pharmacy (*ingrampharmacy.ca*)

- Designed and developed a custom Shopify store supporting 700+ products, tailored to a local pharmacy's business needs
- Collaborated directly with store owner to define requirements and make informed design/UX decisions

Web Developer Consultant **Town of Lake Cowichan** **May - Nov 2024**

Official town website (*lakecowichan.ca*)

- Consulted with town stakeholders and developed quality-of-life improvements for official website
- Implemented client-side features including site search and photo galleries

Fullstack Web Developer Co-op **Ergonomyx** **Sept 2020 - May 2021**

Online store for smart desks and smart bikes (*ergonomyx.com*)

- Designed and implemented responsive UI components and internal dashboards using JavaScript
- Built and maintained full-stack e-commerce features across frontend and backend systems
- Implemented multi-currency (CAD/USD) support, enabling cross-border transactions
- Automated invoice PDF generation, reducing manual processing overhead
- Updated and maintained APIs supporting web storefront and internal integrations
- Improved cross-device responsiveness and layout consistency

Junior Web Developer Co-op **ACD Systems** **Jan 2019 - Sept 2019**

Online store for photo/video editing software (*acdsee.com*)

- Developed and maintained web pages for ACDSee's online storefront

EDUCATION

University of Victoria, Victoria, British Columbia (Bachelor of Software Engineering)
